

invenio

The background of the lower half of the page is a technical drawing of a ball bearing, showing its internal structure with balls and rings. Overlaid on this drawing are several physical ball bearings, some in cross-section, showing the actual balls and the inner and outer rings. The drawing is a detailed line drawing with hatching to indicate depth and shading. The physical bearings are metallic and have a polished finish. The overall composition is a blend of digital technical art and physical reality.

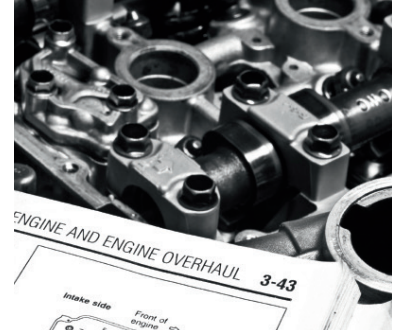

TECHNICAL DOCUMENTATION

- **PRECISION WITH HIGH-PERFORMANCE TECHNOLOGY**
- **EFFICIENCY THROUGH COMPETENCY, EXPERIENCE AND A COMPREHENSIVE PORTFOLIO**
- **HIGH FLEXIBILITY AND ABSOLUTE DEADLINE COMPLIANCE**

OUR SERVICES AT A GLANCE

PRODUCT-RELATED DOCUMENTATION OF DATA AND INFORMATION

- Topic-related research for the development of customised solutions
- System descriptions of product definitions/specifications, operating manuals
- Compliance with guidelines and rules of the customer/supplier
- Controlled use of 'diverse' languages to reduce translating costs
- Digital image processing for didactic visualisation and combining synergies
- Use of the most modern printing technologies including web-based solution/delivery from a single source

START-UP, MAINTENANCE AND SERVICE

- Formulation of instructions for service, testing, maintenance and repairs
- Transparent documentation of built-in-, assembly- and working-parts
- Layout and life cycle assurance on maintenance-intensive components
- Taking manufacturer's requirements into account in the development of maintenance instructions
- Full-Service – from drafting, advanced training to service and support
- We also offer you close customer relations with technical editors on-site

NORMS AND GUIDELINES RESEARCH AS WELL AS DIRECTIVES AND LAWS

- DIN, EN and ISO-norms
- EN 82079-1:2012 – Preparation of instructions for use; VDI 4500 'Technical Documentation'
- Guideline 2006/42/EG (Machine Guideline) as well as electromagnetic compatibility (EMC)
- Company standards and product-dependent guidelines
- Compliances with the safety guidelines of the Association for Technical Communication e. V. (tekomp)
- Definitions of legal certainty and laws under the European understanding of law

Customers can expect short delivery times with the highest quality standards from us. Challenge us – even with special problems. Our goals are satisfied customers and lasting partnerships. I stand up to meet these demands.
